

Innovative safety and efficiency for the mining and earthmoving maintenance industries.

Product Catalogue 2017

TRACKED ELEVATING DEVICE

TED - remote controlled, all terrain, multi purpose workshop tool. Safe. Versatile. Simple.

Tracked Elevating Device

Meet the only remote controlled, all-terrain, hydraulic, belly plate jack on the market; also known as TED.

By taking advantage of TED's remote-control operation, TED removes maintenance personnel from suspended load hazards during maintenance operations; particularly in the critical lowering phase of belly plate removal.

Having a TED on your worksite doesn't just safeguard your workers from potentially fatal suspended load crush injuries, it can also drastically improve efficiency in many repair and maintenance applications.

Being all terrain, TED can be deployed to the pit quickly and easily. Field maintenance removes the need to float plant back to the workshop, resulting in massive savings on both down time and float costs.

TED comes with blade attachment as a standard inclusion to clear a flat work surface.

Vital Workshop Tool

By purchasing TED as part of a package, you can improve the safety and efficiency of so many more maintenance jobs for only a small additional cost.

Don't risk back and joint injuries from heavy lifting and twisting in confined spaces. Get your fitters a complete TED package and send them home safely at shift's end.

KIT-TED-ATT-000-00

TED Specifications

Length	1374mm
Width	778mm
Height	315mm-1172mm
Ground Clearance	60mm
Weight	580kg

TRACKED ELEVATING DEVICE

TED - remote controlled, all terrain, multi purpose workshop tool. Safe. Versatile. Simple.

Essential attachments

These 4 attachments will take TED from being a safety must have, to an all around workshop hero!

(Also available as a package)

Stand Locating Tool (Rhino attachment)

Front attachment.

Position heavy stands under machines with ease using the Rhino/Stand locating tool.

Rated to lift 200kg

TED-ATT-003-01

Steer Cylinder Cradle

Turntable attachment.

Designed to aid in the removal and replacement of steer cylinders, tie rods and other cylindrical components.

Rated to support 800kg

TED-ATT-005-01

Track Roller Carrier

Front attachment.

Designed to assist in changing track rollers.

Rated to lift 200kg

TED-ATT-004-01

Cutting Edge Tool (GET attachment)

Turntable attachment.

Take the weight out of GET changes with the cutting-edge attachment tool.

Rated to support 800kg

TED-ATT-006-01

TRACKED ELEVATING DEVICE

TED - remote controlled, all terrain, multi purpose workshop tool. Safe. Versatile. Simple.

Additional attachments

Let TED improve efficiency and lower manual handling on a huge range of jobs around your workshop.

Double Sided GET

Turntable attachment.

Perfect for rolling, cleaning and refit of cutting-edges whilst minimising the manual handling element.

Rated to lift 800kg

TED-ATT-020-00

Tyre Handler

Front attachment.

Our user friendly design features adjustable arms, rollers to make manouvering tyres for many different vehicles easy, and a massive lifting capacity of 400kgs when used with the available counter weight.

Rated to lift 400kg (with counter weight)

TED-ATT-016-00

Fork Tynes

Front attachment.

Move heavy equipment around in tight low spaces with our adjustable width fork tynes.

Rated to lift 440kg (with counter weight)

TED-ATT-019-00

Slope Jig

Turntable attachment

Improve the process of changing Y-links and letourneau ball caps with the adjustable slope jig table able to operate up to angles of 45 degrees.

Rated to lift 400kg

TED-ATT-009-00

TRACKED ELEVATING DEVICE

TED - remote controlled, all terrain, multi purpose workshop tool. Safe. Versatile. Simple.

Capability multipliers

Increase efficiency on an even greater range of tasks.

Pivot Table & Sump Tray combo

Turntable attachment.

The pivot table can vary it's tilt up 20 degrees, making it perfect for supporting components on an angle. Works perfectly in tandem with the sump tray to remove sumps in awkward hard to reach places.

Rated to lift 200kg

TED-ATT-013-00 (pivot)

TED-ATT-014-00 (sump)

Extension Blocks

Increase the reaching height of the turntable attachments like the steer cylinder cradle and cutting edge tool by up to 600mm.

Rated to lift 800kg

TED-ATT-012-00

Counter Weights

Rear attachment.

Use a counter weight to safely increase the lifting capacity of the fork tyne and tyre handler attachments.

Weight 200kg

TED-ATT-018-00

Belly Plate Stands (legs)

This set of 4 sturdy stands will support the load of a belly plate, freeing up TED to continue with other jobs.

Rated to 800kg

TED-ACC-001-00

TRACKED ELEVATING DEVICE

TED - remote controlled, all terrain, multi purpose workshop tool. Safe. Versatile. Simple.

Kit

Keep TED clean, charged and ready to work at a moment's notice.

Pit Rescue Trailer

Custom built to mine specifications.
Transport TED from workshop to pit, or site to site with a pit rescue trailer.
Loading and unloading is quick and easy with tailgate ramps.
The pit rescue trailer is an absolute must for maintenance contractors working on several sites.

TED-ACC-004-00

TED Sleeping Bag

Vinyl throw over cover to keep the workshop dust and grime off your TED.

TED-ACC-002-00

TED Home

A perfect storage area for TED and its multiple attachments.

Designed to fit up to 14 attachments neatly, safely, and make sure TED is parked up and charging at the end of every use out of the way.

A great way to easily transport TED along with attachments and accessories from site to site, or workshop to pit; the TED home is fitted with tie down and attachment points for safe travel.

TED-ACC-003-00

TRACKED ELEVATING DEVICE

TED - remote controlled, all terrain, multi purpose workshop tool. Safe. Versatile. Simple.

Training
